

Hello, I'm Robyn and welcome to the Path to Mastery.

Practicing Mastery in this work is a process of strengthening your intuition, developing a closer connection with your higher self and soul, communicating in more intuitive ways, strengthening the practice of observation without attachment, but with love and compassion, allowing you to retain your energy and stay empowered.

Your life force grows, you're more able to trust knowing that there is a divine plan in action, and releasing what you can't control, allowing so much more harmony in the way you live and the way that you love and care for others.

Teaching and sharing your knowledge with those magnetized to you becomes natural, and in the 'Path to Mastery' you're given everything you need to practice energy healings to an advanced level, confidently hold workshops, retreats and teach.

In '**Conscious Light - healing energy program for the beginner**', you will soothe and help others heal using energy through your hands and body.

Combining this work with the techniques in the '**Path to Heart Based Power**' you empower others with the inner techniques required to strengthen their energy and grow their life force.

In '**Conscious Light - awaken the master within**' you will be practicing advanced energy healing techniques, further empowering your clients and included is everything you need to become confident with holding meditation groups, heart healing workshops and retreats.

In '**Conscious Light - the master awakened**' you'll receive

- an 'attunement' where you will meet with your Master who has already been helping you in Spirit and will be with you in your journey ahead,
- three certificates as 'Master of Conscious Light' to proudly display,
- the 'Master Manual' which teaches you to own your value, how to handle your inner critic and outer critics, practice the 'frequency of unity' and more,
- a generous affiliate for the clients you share any of this work with using a very clever code.

My Master and other guides who work with me in Spirit co-created this work by showing me pictures and presenting me with one word at a time, with what eventually became the 'Path to Mastery'.

I had no idea at the very beginning what I was creating because I was only given what I was able to handle at the time... and I have to admit to experiencing a great deal of frustration over that! But of course, it was for the best, anyway, eight years later it is complete.

Right from the beginning, my guide stressed this work was to be created in a visual way, to ensure we also serve the hard of hearing and the deaf community, which is why the guided meditations are created in a visual way and the video instructions are subtitled and transcribed.

If this is a journey you would love to take in your life, there is support in the way of private Facebook groups and online gatherings, and we so welcome you to our tribe. It is my intention, as ever, that your heart allow more fully, the feelings of ease, peace, love and freedom and I send you all my love.
