

Hello, I'm Robyn, and welcome to 'Conscious Light - healing energy program for the beginner'.

This is the fourth course in the 'Path to Mastery' and when you enrol, you receive all four courses, unless you choose to upgrade as you progress - which is another option for you.

In 'Conscious Light - the beginner, you will become confident with the practice of projecting healing energy through your hands onto another.

These practices are easy to understand through subtitled video instructions, which are transcribed and written instructions through an e-book, and above all there's no mistake with this work when your intention is love.

*Everyone can do this because everyone is naturally a healer when they have love as their intention.*

You will be shown the tools, the techniques, the invocations and have a checklist to refer to, so it's easy for when you begin. All you need then is your love!

You empower others further when you include the techniques in the 'Path to Heart Based Power', as you introduce to them the practices which they can use to heal from within. You will find shifts in the life force in those you serve and incredible shifts within you.

If this is a journey you would love to take in your life, there is support in the way of Facebook groups and online gatherings, and we so welcome you to our tribe.

As ever it is my intention that your heart allow more fully the feelings of ease, peace, love and freedom, and I send you all my love.
